The questions in this framework aim to help local authorities consider the technical, data and service requirements for implementing the different user journeys of the Family Context tool. By answering them, they should have a clearer idea as to which user journey would be most appropriate for the local context.

Technical questions		Questions	Answer	Source
	1	Can you demonstrate that you are able to match the CMS record to the school record for a given child?		
	2	Is it possible to match individuals across school, housing, ASC and police datasets?		
	2a	Do you have a matching algorithm in place?		
	2b	Do first name, family name, DOB and address exist in Police, ASC and Housing datasets?		
	3	Do adults have unique ID in the child CMS or that the SWs otherwise can access?		

User journey 1 allows social workers to search for any relevant individual to view their service involvement information.

	Questions		Leeds Answer	Source
Technical Questions	1	Is it possible to restrict the search results returned to only cover specific groups of individuals?		

User journey 2 allows social workers to search for any child on their case load to view their service involvement and the service involvement of individuals that have been linked to the child in the Case Management System
